

MAHMUDUL HASAN

Front End Developer

☎ 01716-792397 @ Hasan22dev@gmail.com 📍 Dhaka, Bangladesh

ABOUT ME

Front-End Developer with 3 years of expertise in JavaScript, React, and PHP, focusing on WordPress Gutenberg development. Skilled in creating dynamic, user-friendly websites that meet client requirements and business goals. Demonstrates strong problem-solving abilities and a passion for leveraging modern web technologies to improve functionality and design.

WORK EXPERIENCE

Front End Developer

XpeedStudio | Roxnor

Table Builder

📅 04/2025 - Present

- Architected a full-featured table plugin for the Gutenberg Editor with multi-source data integration and live data synchronization.
- Integrated multiple data sources: Google Sheets, CSV, JSON, WordPress posts, and WooCommerce products with REST API support.
- Implemented InnerBlocks functionality enabling any Gutenberg block to be embedded within table cells.
- Developed comprehensive feature set including freeze rows/columns, cell merging, conditional display, data filtering, and other advanced functionalities.
- Built a comprehensive user interface with search, pagination, sorting, export functionality, and additional capabilities.

Technologies:

WordPress, Gutenberg, PHP, JavaScript, React, API Integration.

Gutenkit

📅 11/2023 - 03/2025

- Developed a comprehensive WordPress add-on for the Gutenberg Editor from the ground up.
- Built complex custom blocks, modules, and plugin architecture.
- Contributed to technical decision-making on code structure and feature development.
- Collaborated with senior developers on architectural planning and implementation strategies.

Technologies:

WordPress, Gutenberg, PHP, JavaScript, React, API Integration.

EmailKit

📅 10/2022 - 02/2023

- Developed EmailKit from scratch, a comprehensive WordPress and WooCommerce email customizer tool with drag-and-drop functionality.
- Architected complete plugin structure and developed major system components for email template management.
- Built an intuitive drag-and-drop dashboard using Craft.js, enabling users to create personalized email templates within minutes.
- Created pre-made template library and branding tools for various WooCommerce actions and events.

• **Technologies:** WordPress, PHP, JavaScript, Craft.js
